

Collaborative Research: **Adaptation & Implementation of Activity & Web-Based Materials Into Post-Calculus Introductory Probability and Statistics Courses**

Principle Investigators

- **Tracy Goodson-Espy**, The University of Alabama, Huntsville
- **M. Leigh Lunsford**, The University of Alabama, Huntsville
- **Ginger Holmes Rowell**, Middle Tennessee State University

Project Objectives

- To improve post-calculus students learning of probability & statistics.
- To provide students with better preparation for their future careers in math & statistics, math education, & computer science.

Materials Used

- ***“A Data-Oriented, Active Learning, Post-Calculus Introduction to Statistical Concepts, Methods, and Theory (SCMT)”***
 - A. Rossman, B. Chance, K. Ballman, NSF DUE-9950476
- ***“Virtual Laboratories in Probability and Statistics (VLPS)”***
 - K. Siegrist, NSF DUE-9652870
